

SPAYING CATTLE USING WILLIS DROPPED OVARY PROCEDURE

This unit equips you with the essential skills and knowledge to plan, prepare, and perform the Dropped Ovary Technique (DOT) procedures, including post-procedure care, for controlling fertility in female cattle within extensive beef herds.

✓ Plan and Prepare for DOT Procedures

✓ Perform the DOT Procedure

✓ Provide Post-Procedure Care

AgForce Training RTO 46192

WHAT YOU'LL LEARN

 **AHCLSK338** - Conduct dropped ovary technique procedures for spaying cattle

Participants are required to have at least one year of experience working with cattle.

This unit is currently offered through Recognition of Prior Learning (RPL) pathway. As a way of recognising your existing and current skills and knowledge within formal vocational education and training. Applicants will be required to provide evidence that they have experience in spaying using the **Willis Dropped Ovary Technique**.

Upon successful completion you will then be eligible to apply for accreditation as non-veterinarian spayer (or lay spayer) via the industry-endorsed and operated accreditation scheme.
